-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/20/08 has been entered.

Claim Rejections - 35 USC § 102

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 1, 2, 8, 13, 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Beller (WO 9608227).
4. Beller discloses a syringe to syringe mixing apparatus comprising an elongate body 3, nozzle 4 having an enlarged mixing chamber between the nozzle and the syringe receiving portion, a first syringe 1, and a second syringe 2 that are received in the elongate body. Beller discloses a flow modifying element 4. The second enlarged portion (to the right of numeral 4) is interpreted to be a second nozzle. See Fig. 5 included below.

5.

Claim Rejections - 35 USC § 103

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Beller.
3. Claim 7 differs from Beller in calling for the first flow area to be about five times greater than the second flow area. Where the only difference between the prior art and the claims was a recitation of relative dimensions of the claimed device and a device having the claimed relative dimensions would not perform differently than the prior art device, the claimed device was not patentably distinct from the prior art device. See MPEP 2144.04.

Response to Arguments

4. Applicant's arguments filed 4/28/08 have been fully considered but they are not persuasive. The examiner's new interpretation of the Beller reference, wherein mixing element 4 is interpreted to be the nozzle overcomes applicant's arguments.
